

HFIA Communiqué 35

*The Newsletter of the HF Industry Association (HFIA)
December 2000*

AFCEA West2001 Exposition

The next HF Industry Association (HFIA) meeting will be held during the AFCEA West2001 Exposition in San Diego, California, on Thursday, January 25, 2001. For more information regarding this exposition, please see www.west2001.org. The meeting will be held at the following location:

Conference Room 1B (Upper Level) in the Convention Center
AFCEA West2001 Conference and Exposition
San Diego Convention Center
San Diego, CA

We are putting together an interesting agenda, which will include presentations and discussions on key developments in the HF industry. In recent months, a lot of progress has been made implementing the new MIL-STD-188-141B, STANAG 5066, and MIL-STD-188-110B HF standards. Some equipments are already commercially available and are being fielded. Collectively, these new standards will form the basis for the next generation of HF radio systems offering higher data rates, unprecedented communications reliability, and a true HF networking capability. This meeting will provide useful information to both industry and government representatives. The topics covered:

- Information on the latest MIL-STDs and NATO STANAGs
- Reports on HF projects
- Reports on testing
- Election of officers

The agenda will be published next month. If you have a presentation that you would like to give or equipment that you would like to demonstrate, please send me a short email so that we can work it into the schedule.
