November 2002*

HF Channel Simulator Implementation Meeting

At the last HFIA meeting (June 2002 in Washington, DC) it was decided that the HFIA would draft a white paper recommending a set of requirements for the implementation of an HF channel simulator. A meeting on this subject will be held on the evening of Thursday, January 16, 2003 after the HFIA meeting (*Refer to HFIA Communiqué 39 for detailed information on the full HFIA meeting*). Please respond to Bill Furman from Harris via e-mail at "[Furman, William](mailto:WFurman@harris.com)" <WFurman@harris.com> if you are interested in attending so that we can make arrangements for a meeting room at a restaurant in San Diego. As the meeting gets closer more details will be forthcoming.

You may wish to review the following paper presented by Harris at the last HF Nordic Conference.

Harris Nordic HF
Channel Simulator Paj

In addition you may wish to review the presentations made by Harris at the last HFIA meeting. These presentations are available at the HFIA website at <http://www.hfindustry.com/> or by using the following direct links.
